

Implementation of the FY2026 Countermeasures to Combat Infectious Diseases in Asia (CCIDA)

FY2026 CCIDA Meeting Schedule and Plan

1 Meeting System

- In fiscal year 2026, we intend to leverage the advantages of online meetings to create as many opportunities for interaction as possible. We plan to hold three regular meetings, but we also aim for active communication between cities, including individual meetings and information exchange as needed.
- Regarding the agenda items, we would like to use the regular meetings to exchange opinions and make decisions in preparation for the Tokyo Conference..

2 Proactive Utilization of k-net

In fiscal year 2024, we made preparations, including organizing IDs, in order to resume the use of k-net. There is a plan to revamp k-net for fiscal year 2026, which we believe will make it easier to use as an information sharing tool. We believe that digitalization of information sharing and effectiveness will be essential in the future, and therefore we aim to actively utilize it and consider building an efficient information sharing system.

◆ About the 2026 CCIDA General Meeting

◎ Revival of the Tokyo Conference (In-Person)

→ In FY2026, we plan to hold an in-person conference in Tokyo.

*The CCIDA Tokyo Conference is planned to be held for several days starting February 1st, in conjunction with the Tokyo iCDC Forum at the end of January.

◎ Regarding the Meeting Format

→ We plan to hold an in-person meeting at the Tokyo venue simultaneously with an online session.

(For example, some participants may travel to Tokyo, while others can participate online from their respective cities)
